Assembly Instructions

Retro

JumpStar Retro Trampolines

Trampoline Specifications:

- 7ft(214cm) x 10ft(304cm)
- 8ft(244cm) x 12ft(366cm)

Springs:

- 68
- 88

WARNING

NO MORE THAN ONE PERSON AT A TIME ON THE TRAMPOLINE! MULTIPLE JUMPERS INCREASE THE RISK OF INJURY SUCH AS BROKEN HEAD, NECK, LEG, OR BACK

PARALYSIS OR DEATH CAN RESULT IF YOU LAND ON YOUR HEAD OR NECK! DO NOT PERFORM SOMERSAULTS (FLIPS AS THIS WILL INCREASE YOUR CHANCES OF LANDING ON YOUR HEAD OR NECK

SAFETY PRECAUTIONS

Trampolines are amazing fun for the whole family if care is taken and children are taught the right and safe way to use them.

Trampolining is a popular activity which provides children with both physical exercise and enjoyment. The injury risks associated with trampolining are high, and can have serious consequences

Trampolines are a fun way to exercise and help to develop co-ordination, balance and motor skills. However, they need to be used appropriately as they are also the cause of many injuries to children. Injuries can occur when children fall off or hit the side of the trampoline, impact one another or sustain injuries from double bounce.

Younger children are at risk as they can wander underneath and get hit when someone bounces above them. Injuries can include cuts, bruises, sprains and fractures and the most severe risks include injuries to the child's brain and spine.

Trampolines require regular inspection and maintenance and children should always be supervised when using one.

Most trampolines now come with a safety net or enclosure and we strongly recommend you only use a trampoline with a net or enclosure installed. This is a safety precaution and aims to prevent children falling off the trampoline and also to absorb the impact of any potential falls before the child reaches the padding.

Inspect the trampoline before each use to make sure that the mat does not have holes, the frame is not bent, the springs are securely attached, the frame padding is correctly and securely positioned, and the leg braces are securely locked. A trampoline in poor condition will increase risk of injuries. Inspect the trampoline before each use for bent steel tubes, torn mat, loose or broken springs, and overall stability of the trampoline.

Make sure that the surface under and around the trampoline (the safe fall zone) is soft - use wood chips, sand, or cushioning material. The safe fall zone should be at least two metres wide on all four sides of the trampoline.

Keep the safe fall zone clear from hazards such as fences, toys, and overhead objects like clothes lines, trees and wires. A minimum overhead clearance of eight metres from ground level is recommended.

Make sure that children are supervised at all times. Take particular care with children under six years of age.

DO NOT use the trampoline if there are pets, other people, or any objects underneath the trampoline. This will increase the chances of an injury occurring. DO NOT hold

any foreign objects in your hand and DO NOT place any objects on the trampoline while anyone is playing on it. Please be aware of what is overhead when you are playing on the trampoline. Tree limbs, wires, or other objects located over the trampoline will increase your chances of getting injured.

Please be aware of the weather conditions when using the trampoline. If the mat of the trampoline is wet, the jumper could slip and injure him or herself. If it is too windy, jumpers could lose control.

Supervise children at all times, regardless of age. It is recommended that children under six should not use trampolines but if they do, take extra care with younger children as they are more prone to serious injury on trampolines.

JUMPERS

- Do not use trampoline if you have consumed alcohol or any drugs
- Remove all hard sharp objects from person before using trampoline
- You should climb on and off in a controlled and careful manner. Never jump on or off the trampoline and never use the trampoline as a device to bounce onto or into another object.
- Always learn the basic bounce and master each type of bounce before trying more difficult types of bounces.
- To stop your bounce, flex your knees when you land on the mat with your feet
- Always be in control when you are bouncing on the trampoline. A controlled jump is when you land at the same spot that you took off from. If at any time you feel out of control, try to stop your bouncing.
- Do not use trampoline if you have consumed alcohol or any drugs
- Remove all hard sharp objects from person before using trampoline
- Always be in control when you are bouncing on the trampoline. A controlled jump is when you land at the same spot that you took off from. If at any time you feel out of control, try to stop your bouncing.
- Do not jump or bounce for prolonged periods of time or too high for a number of jumps
- Never have more than 1 person on the trampoline at any time
- Always have a supervisor watching you when you are on the trampoline

SUPERVISORS

Educate yourself with the basic jumps and safety rules. To prevent and reduce the risk of injuries, enforce all safety rules and ensure that new jumpers learn the basic bounces before trying more difficult and advanced jumps

- All jumpers need to be supervised, regardless of skill level or age.
- Never use the trampoline when it is wet, damaged, dirty, or worn out. The trampoline should be inspected before any jumpers start bouncing on it.
- Make sure there is only one person jumping at any time
- Keep all objects that could interfere with the jumper away from the trampoline. Be aware of what is overhead, underneath, and around the trampoline.

To prevent unsupervised and unauthorised use, the trampoline should be secured when not in use.

WINDY CONDITIONS

In severe wind situations, the trampoline can be blown about. If you expect windy weather conditions, the trampoline should be moved to a sheltered area or disassembled. Another option is to tie the round, outside portion (top frame) of the trampoline to the ground using ropes and stakes. To ensure security, at least three (3) tie downs should be used. Do not just secure the legs of the trampoline to the ground because they can pull out the frame sockets.

MOVING THE TRAMPOLINE

If you need to move the trampoline, two people should be used. All connector points should be wrapped secured with weather resistant tape, such as duct tape. This will keep the frame intact during the move and prevent the connector points from dislocating and separating. When moving, lift the trampoline slightly of the ground and keep it horizontal to the ground. For any type of other move, you should disassemble the trampoline.

TRAMPOLINE PLACEMENT

The minimum overhead clearance required is 24 feet (7.3 meters) and a clearance of 2m around the perimeter of the trampoline. In terms of horizontal clearance, please ensure that no hazardous objects are near the trampoline such as tree limbs, other recreational objects (i.e. swing sets, swimming pools), electrical power wiring, walls, fences, etc.

For safe use of the trampoline, please be aware of the following when selecting a place for your trampoline:

- Make sure it is placed on a level surface
- The area is well lit
- There are no obstructions beneath the trampoline

If you do not follow these guidelines, you increase the risk of someone getting injured.

⚠ WARNING!

ASSEMBLY INSTRUCTIONS

To assemble this trampoline all you need is our special spring loading tool provided with this product.

During periods of non-use. This trampoline can be easily disassembled and stored.

Please read the assembly instructions before beginning to assemble the product.

PRIOR TO ASSEMBLING

Please refer to page for part descriptions and numbers. The assembly steps use these descriptions and numbers as reference for your convenience.

Make sure that you have all parts listed. If you are missing any parts, please refer to page for Instructions on how to attain any parts.

To prevent any injuries to your hands from pinch points during assembly, please use gloves to protect your hands.

PARTS LIST

Please select your trampoline size.

Reference Number	Description	Quantity	
		7' x 10'	8' x 12'
1	Trampoline Mat, stitched with V-Rings	1	1
2	Frame Pad	1	1
3	Top Rail with Leg Sockets	2	2
4	Top Rail	2	2
5	Vertical Leg Extension	4	4
6	Leg Base	2	2
7	Galvanised Springs	68	88
8	Safety Instruction Placard	1	1
9	Spring Loading Tool	1	1
10	Support tube	2	2
11	Screw set	2	2

DIAGRAM FOR PARTS:

REMEMBER TO USE GLOVES DURING ASSEMBLY TO AVOID PINCHING AND IT WILL TAKE AT LEAST TWO PEOPLE TO ASSEMBLE THE TRAMPOLINE

STEP 1- Assembling the Main Frame

- A.** Ensure button pins are fully located. Slide all Leg Extensions (5) onto the Leg Base(6) as shown.
- B.** Two people will be necessary at this point to assemble the trampoline. One person lifts the Support Assembly from step A to a standing position and inserts one of the sockets of the Top Rail with Sockets (3) into the Vertical Leg Extension portion of the Support Assembly. The other person holds the other end and inserts that portion into the other Support Assembly as shown. You should now have 2 Support Assemblies held together by 1 Top Rail with Socket.
- C.** Now, install the other Top Rail(4) into Top Rail with Leg Sockets(3) the both ends.

- D.** Using the tools and hardware provided, connect 4 and 6 with 10

STEP 2 - Trampoline Mat Assembly

When attaching springs to the trampoline mat, please be careful. You will need another person to help you with this portion of the assembly. BE CAREFUL when attaching the Springs, the Connector Points can become pinch points as the trampoline is tightening up.

- A.** Lay out the Trampoline Mat (1) inside the frame

B. How to use the special spring tool.

STEP I : Position the spring on the eyelet of the jumping mat, attach tool and link up to the end of the spring hook

STEP II : Extend spring tool and link up spring hook to the hole on the trampoline frame.

Please be careful where you place your hands and other parts of your body during spring assembly as connector points become pinch points!

C. Select your spring quantity.

1. Place 1 spring in each corner.

2. Then use 2 springs equally spaced along each edge - this will equalise the mat.

3. Assemble remaining springs

TIP Use equal amounts along each edge to keep the mat tension equal.

D. If you notice that you have skipped a hole and V Ring connection, recount and remove or attach any springs required to maintain the count of springs.

STEP 3 - Frame Pad Assembly

- A.** Lay the Frame Pad (2) over the trampoline so the springs and the steel frame are covered. Please ensure the Frame Pad covers all metal parts. You can also turn over cover.

- B.** Tie the strap located at the under side of the frame pad to the frame.

- C.** Select your Pad model.

CARE AND MAINTENANCE

This trampoline was designed and manufactured with quality materials and craftsmanship. If proper care and maintenance is provided, it will provide all jumpers with years of exercise, fun, and enjoyment as well as reduce the risk of injury. please follow the guidelines listed below:

This trampoline is designed to withhold a certain amount of weight and use. Please make sure that only one person at any one time uses the trampoline. Also, the person should weigh less than 100kgs. Jumpers should either wear socks, gymnastics shoes, or be barefoot when using the trampoline. Please be aware that street shoes or tennis shoes should NOT be worn while using the trampoline. In order to prevent the trampoline mat from getting cut or damaged please do not allow any pets onto the mat. Also, jumpers should remove all sharp objects from their person prior to using the trampoline. Any type of sharp or pointed objects should be kept off the trampoline mat at all times.

Always inspect the trampoline before each use for worn, abused or missing parts. A number of conditions could arise that may increase your chances of getting injured. Please be aware of:

- Punctures, holes, or tears in the trampoline mat
- Sagging trampoline mat
- Loose stitching or any kind of deterioration of the mat
- Bent or broken frame parts, such as the legs
- Broken, missing, or damaged springs
- Damaged, missing, or insecurely attached frame pad
- Protrusions of any types (especially sharp types) on the frame, springs, or mat

IF YOU FIND ANY OF THESE CONDITIONS OCCUR, OR ANYTHING ELSE THAT YOU FEEL COULD CAUSE HARM TO A USER, THE TRAMPOLINE SHOULD BE DISASSEMBLED OR NOT USED UNTIL THE CONDITION(S) HAVE BEEN RECTIFIED

Enjoy your trampoline!
